APPROACH

Orton-Gillingham Basic Training 5 Days

A professional learning course in the evidence-based Orton-Gillingham Language Approach.

Designed to build strong, structured literacy instruction for SLD, dyslexia and students struggling with reading and spelling.

"Using OG in the intervention space, I've seen students go from struggling to spell simple words like 'pink' to accurately writing complex phrases like 'the introduction to the lecture was quite drawn out', all in under 30 hours. It's not about the OG resources being magical; it's about understanding how literacy develops at the subskill level and using structured, sequential instruction to build it. That knowledge makes teaching more targeted and effective, especially for those who need it most."

OG Trained Tutor

Learn to deliver explicit, sequential, and multisensory lessons through hands-on practicum, classroom-ready tools, and diagnostic, responsive teaching strategies.

"Nearly all of my clients have started as 'reluctant' readers, who actually don't read for pleasure at all, but even the most reluctant of them have, within a few months, asked to borrow decodables to take home, or asked their parents if they can swing by a bookshop on the way home from the lesson."

OG Trained Tutor

March 2026 | Hobart

Perfect for teachers, literacy coordinators, learning support staff, and intervention specialists—particularly those working in Tier 2 and Tier 3 settings.
